#### APPLICATION FOR AMENDMENT OF POLLUTION CONTROL PERMIT PE-1815

THIS APPLICATION is to be filed with the Director of Pollution Control, Parliament Buildings, Victoria, B.C. V8V 1X4.

Any person who qualifies as an objector under section 13 of the *Pollution Control Act* may, within 30 days of the date of application, or within 30 days of the date of publication in *The British Columbia Gazette* or in a newspaper, or where service is required, within 30 days of serving a copy of the application, file with the Director at the above address an objection in writing to the granting of an amendment, stating the manner in which he is affected.

*Preamble*—The purpose of this application is to apply for amendment to Permit PE-1815 to delete under section (d) in Appendix 01 the stickwater evaporation requirement and as an alternative to discharge diluted stickwater from the reduction plant into Inverness Passage.

Frank K. Spencer, c/o The Canadian Fishing Company Limited, Vancouver, B.C., hereby applies for amendments, as described below, to Pollution Control Permit PE-1815, granted on December 11, 1973, which authorized the discharge of 27,300 imperial gallons a day (average), and 48,000 imperial gallons a day (maximum) of effluent from the North Pacific fish-processing plant located at Port Edward, B.C., to Inverness Passage.

*Amendments Requested:*

Permit PE-1815 authorizes the discharge of an average of 27,300 imperial gallons a day and a maximum of 48,000 imperial gallons a day of effluent into Inverness Passage.

At the present time the reduction plant is the only operating process at North Pacific as we have not processed herring roe since March 1973.

We are proposing to dilute the 9,000 imperial gallons a day of stickwater from the reduction process with river water on a 20 to 1 basis before discharging the diluted effluent into Inverness Passage. On this basis, the quantity of discharged effluent would be 189,000 imperial gallons a day.

We are now conducting tests to determine the dilution ratio that will meet the acceptable effluent characteristics under Appendix 01-1 of Permit PE-1815.

This application, dated on June 11, 1979, was posted on the ground in accordance with the Pollution Control Regulations.
